COMPOSITES DISTRIBUTION

For more than 20 years, COMPOSITES DISTRIBUTION distributes composite materials for aerospace, space and defence industries with EN9120-2010 certification.

These weight saving materials, with high stiffness and strength, are increasingly used in every new aircraft programs.

Our products include carbon fibers, structural adhesives, honeycombs, prepregs, sandwich panels and reinforcement fabrics.

This comprehensive range of qualified products is used widely in commercial aerospace, helicopters, defence and space programs.
